RE: Statement in Support of Bill 80, CD1

Chairwoman Barbara Marshall and members of the Honolulu City Council,

As medical students from the University of Hawaii at Manoa, John A. Burns School of Medicine, we are writing you in support of Bill 80, CD1 relating to transit technology.

We recognize traffic is bad and will only get worse. It will continue to negatively affect both our quality of life as well as the economy. Our highways and roads are overcrowded and we need a long term solution to mobility. We understand the impact traffic will continue to have on our daily lives and the need for transportation alternatives.

As residents and future professionals, who will be paying for the fixed guideway, we support mass transit and the steel on steel rail technology. We understand it has the best record for operational reliability, and in the long run it is the most logical choice due to its cost-efficiency.

Please pass Bill 80, CD1. Thank you.

Signed,
